Senior React Native Engineer with 4+ years of experience shipping iOS and Android apps in production, along with the backends behind them. Understands how each layer of a system works and how it behaves as usage grows, and takes features from idea to production without handoffs. Strongest in real time video, payments and native iOS integrations.

Technical Skills

Languages: TypeScript, JavaScript, Swift, Kotlin, Python

Mobile: React Native, Expo, EAS, React Navigation, Reanimated, Native Modules, Expo Config Plugins, ActivityKit, WidgetKit

State & Data: Redux Toolkit, TanStack Query, Axios, MMKV, SQLite

Real Time & Payments: WebRTC, Daily SDK, Agora, Socket.IO, Stripe Connect, in app subscriptions

Backend & Cloud: Node.js, Express.js, Nest.js, Next.js, MongoDB, PostgreSQL, AWS, Google Cloud Pub/Sub

Delivery & Quality: GitHub Actions, EAS Build and Submit, OTA updates, Sentry, Jest, React Native Testing Library

Experience

Full-Stack & Mobile Developer, CCRIPT Agency

Sep. 2026 – Present

TypeScript | Python | FastAPI | SQL | AI Agents | Next.js

- Architecting invoicing software built to support **18,000+** water hauling truckers for one of the largest US oil and gas supply companies, with a new data schema and FastAPI services.
- Built AI agents that follow up with leads over SMS, book appointments and chase signed agreements for a production client.
- Built an attorney marketing website in Next.js, optimised for Meta ads traffic and compliant with A2P 10DLC requirements.

Senior React Native Engineer, Code Huddle

Sep. 2025 – Sep. 2026

React Native | TypeScript | Expo EAS | Swift | WebRTC | Daily SDK

- Migrated the video calling module from web to React Native using Daily SDK, achieving **20 to 25% faster load times** and stable live sessions with **20+ concurrent users**.
- Built native iOS Live Activities in Swift (ActivityKit, WidgetKit) for incoming calls, started through APNs push to start even when the app is killed.
- Patched React Native WebRTC to resolve iOS audio session conflicts, and built a custom Expo config plugin to keep native iOS extensions working through prebuild.
- Cut App Store and Google Play submission time by **30 to 40%** with automated EAS pipelines, releasing safely through staged OTA updates.
- Upgraded the app from React Native 0.74 to 0.82 on the New Architecture, and fixed an Android memory leak found with Android Studio Profiler.

Full Stack Mobile Developer, Vizz Web Solutions

Sep. 2022 – Aug. 2025

React Native | TypeScript | Redux Toolkit | Node.js | MongoDB | Stripe | Agora

- Led full cycle React Native development across **5+ production apps** in fitness, social, ecommerce and marketplace domains, owning architecture decisions and client communication.
- Built the Node.js, Express and MongoDB backends behind the apps, covering Stripe Connect payouts and refunds, Socket.IO chat, push notifications and S3 media storage.
- Implemented Stripe, Square and Google Pay payments with in app purchases and subscription billing.
- Mentored junior developers, reviewed their code and owned App Store and Google Play releases.

Projects

Gymyg, Live Group Fitness Platform
gymyg.fit

React Native, Daily SDK, WebRTC, Track Player, Swift

- Built group audio and video training with one on one sessions inside live classes, active speaker tile shuffling and music playback during calls.
- Fixed iOS camera stretching, orientation issues and Android video flicker across devices and network conditions.

Famiglia Doro, Social & Ecommerce Platform
App Store

React Native, Node.js, MongoDB, Stripe Connect, Socket.IO, AWS

- Primary engineer on the app and backend for a social, creator and ecommerce platform with feed, reels, stories, groups and real time chat.
- Built order management with Stripe Connect payouts released on delivery, and an affiliate program paying creator commissions through Stripe Connect.
- Delivered event ticketing with QR tickets and resale, with **zero payment failures** in production.

HBCUMADE, Community & Events App
hbcumade.app

React Native, Node.js, MongoDB, Socket.IO, Agora, Stream, Redis, Stripe Connect

- Primary engineer on the React Native app and Node.js backend for a community, events and live streaming app, working with one collaborator on static screens.
- Built live streaming with Agora and Stream, with Redis deduplicated webhooks so followers get exactly one push when a host goes live.
- Built the event management module with ticketing, integrating third party platforms such as Eventbrite and writing data models that transform their data to align with our schema.

Education

COMSATS University Islamabad — Islamabad, Pakistan
Bachelor of Science in Computer Science — Feb. 2018 – Jul. 2022

Certifications

Continuous Integration and Continuous Delivery (CI/CD), IBM	Jul. 2025
Advanced Programming in Kotlin, Meta	Aug. 2024
Architecting Solutions on AWS, Amazon Web Services	May 2024

Languages

English (C1) | Urdu (C2) | German (A2)
